DETAILED ACTION

This communication is in response to Applicant's amendment filed on October 1, 2008. Claims 1-4 and 6-10 are pending. The rejections cited are as stated below:

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-4 and 6-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-4 and 6-10 recite a process comprising method steps such as receiving, performing, creating and converting. Based on Supreme Court precedent, a proper process must be tied to another statutory class or transform underlying subject matter to a different state or thing (*In Re Bilski*; *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584,588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780,787-88 (1876)). Since neither of these requirements is met by the claim, the method is not considered a patent eligible process under 35 U.S.C. 101. To qualify as a statutory process, the claim should positively recite the other statutory class to which it is tied, for example by identifying the apparatus that accomplished the method steps or positively reciting the subject matter that is being

transformed, for example by identifying the material that is being changed to a different state. Since the steps can be accomplished without the use of another statutory class, it is considered a non-statutory process. It is noted that while the claim recites a computer, the claimed method (in the body of the claim) is not positively tied to such a device. As such, the claimed method steps are not tied to the device.
